platon®

KEEP IT DRY.

Protecting your foundation... the foundation for solid peace of mind

Water; water everywhere... but not one drop gets in.

It's inevitable; a home will be surrounded by water many, many times. If your foundation—the very base for a well-constructed home—doesn't have the proper level of protection, that water can create problems both seen and unseen.

Platon®, is a rugged, dimpled, high-density polyethylene (HDPE) membrane that keeps foundations and flooring dry. It's the “foundation protector” from CertainTeed, the world leader in building products and solutions.

CertainTeed
SAINT-GOBAIN

Whether it seeps in through walls or percolates up through the floor, water can turn an otherwise useful space into a damp, uncomfortable haven for mold and mildew. Platon waterproofing membrane controls both interior and exterior moisture.

Made of tough, durable 24-mil High-Density Polyethylene (HDPE), Platon features a unique “double-dimpled” design that creates an air gap between the membrane and the wall or floor. The dimples keep wet soil away from foundation walls and lift sub-floors off damp, cold concrete basement slabs.

Air gap directs moisture evaporating from concrete walls out of your basement and into the drainage system.

Platon serves as a waterproof barrier between wet soil and foundation walls.

Platon facilitates drainage of excess moisture into CertainTeed's Form-A-Drain system (or conventional drain tile).

Since 1904, CertainTeed has been manufacturing high quality, innovative building products, including roofing, insulation, vinyl and fiber cement siding, vinyl fence, railing and deck and pipe. Our name is derived from the slogan "Quality made certain, satisfaction guaranteed," and reflects an unwavering commitment to the building professionals who rely on us. This commitment, and our many years of experience in product design, were applied to the challenge of creating a better foundation footing and drainage system — and Form-A-Drain is the result. Form-a-Drain lineals are made from 100% recycled PVC for conformance with "Green" building construction practices.

buildingresponsibly™

CertainTeed respects the environment through the responsible development of sustainable building products and systems.

Foundation

Block walls, poured concrete walls, insulated concrete forms — no matter what construction technique is used to build a foundation, some type of waterproofing is necessary to prevent moisture problems.

Platon — the most advanced foundation protector on the market — works with all foundation types. Unlike spray-on products, it is a durable, environmentally responsible HDPE membrane with a dimpled design that physically prevents wet soil from coming in contact with foundation walls. This is accomplished by utilizing an air gap that allows air to flow and moisture to drain.

Platon is a high-performance, stand-alone waterproofing system, eliminating the need for additional waterproofing treatments. It is easily installed and will continue to keep the basement dry even if the concrete cracks or settling occurs. Platon is also ideal for under-slab applications, where it outperforms builder's poly.

With Platon... It's a wrap!

- Made of tough, durable, environmentally responsible, high-density polyethylene
- Unique double-dimpled construction keeps wet soil 1/4" away from the foundation, while providing a waterproof barrier to control interior and exterior moisture
- If water breaches the membrane, it flows through the air gap to the footing drain
- Platon easily bridges 1/4" foundation cracks and keeps working even if walls shift, crack or settle
- Additional waterproofing treatments are not required.

"Up to 90% of Ottawa home builders choose Platon to protect their homes. Due to the incredible infallibility of the product, we experience: zero failure and zero call-backs."

Dan O'Neill

President, Ottawa Structural Residential Services, Ltd.

Platon also isolates flooring from cold, damp concrete. When used beneath a wooden sub-floor and over concrete in a basement, it makes floors comfortable, odor free, dry and better for your health.

PLATON FOUNDATION DRAINAGE

Platon membrane keeps wet soil away from the foundation wall.
