

Technical Data Sheet

MOUNTAIN RIDGE™ Shingles (Hip and Ridge Accessory)

PRODUCT DESCRIPTION

A self-sealing shingle of three-piece construction and thickness of five layers that combines durability with flexibility and good looks, for use in capping hips, ridges, or rakes of shingled roofs. Available in two sizes: 8" W x 12-1/4" L, or 10" W x 12-1/4" L, both with 8" exposure.

Color: Please refer to the product brochure or CertainTeed website for the colors available in your region. Mountain Ridge shingles are designed to blend with all of CertainTeed Landmark Series and Presidential Series shingles. Mountain Ridge accessory shingles will also blend closely with several competitive colors. Please review CertainTeed's Mountain Ridge Color Chart for specific recommendations.

Limitations: Use on hips, ridges, and rakes of roofs only after application of primary roofing shingles to both intersecting roof decks. These shingles are designed to be used with CertainTeed's shingles that reference the use of CertainTeed's "Mountain Ridge Shingles" or "High Profile Shingles". Use "Mountain Ridge" product colors that complement the shingle colors applied to the main roof. For rake application, face-nailing with two aluminum trim or paneling nails of complementary color is required.

Product Composition: Mountain Ridge shingles are composed of a fiber glass mat base. Ceramic coated mineral granules are tightly embedded in specially refined, water-resistant asphalt.

Applicable Standards:

ASTM D 3018, Type I
ASTM D 3462
ASTM E 108 Fire Resistance: Class A
ASTM D 3161, Class F Wind Resistance
UL 790 Fire Resistance: Class A
UL 997 Wind Resistance
CSA Standard A123.5-98 (& -05)
NYC-MEA-120-79M

MAINTENANCE

Mountain Ridge shingles do not require maintenance when installed according to manufacturer's application instructions. However, to protect the investment, any roof should be routinely inspected at least once a year. Older roofs should be looked at more frequently.

TECHNICAL SERVICES

Complete technical support and assistance is available through Architectural Support personnel, Territory Managers and the fully staffed and equipped Research and Development facility in Blue Bell, PA.
